

**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph on page 3 beginning on line 26 with the following:

--According to another aspect of the invention, a method of de-licensing a software program to a computer, the computer having a microprocessor containing identity information about the computer, including starting the de-installation of the software program to the computer, transmitting a license key and the identity information about the computer to a central database, receiving information to unbind the license key to the identity information, unbinding the license key to the identity information in the computer, and completing the un-installation. --

Please replace the paragraph on page 16 beginning on line 24 with the following:

--Referring to Fig. 10, a system 1010 for transactions between digital identities includes one or more systems 100 and one or more communication links 1005. There is a first system 100a and a second system 100b coupled by the communication link 1005. The communication link 1005 is any communication means, for example, an Internet connection, keycard access, or an ATM digital identity device jack. The digital identity data 220 of the systems 100 include information that are particular to the individuals or corporations involved in the transactions. The individual digital identity devices 105 allows only authorized access to the digital identity data 220 of each system 100. The authorized access to the digital identity data 220 of each system 100 is relayed to the GRID 905 during set up of the database 915. The system 100 is used for transactions, such as, Internet retailing, banking, business-to-business, electronic permission, and secure communications. This would be similar to the process of establishing an account with a bank or establishing credit with a financial institution. The digital identity

devices 105 contain information for the transactions, for example, bank balances, credit card balances, payments, electronic travelers checks, and security transactions.--

On page 21, in the paragraph beginning on line 26:

--In step 1320, the vendor computer 1110 completes the un-installation process by updating the software key database 1140. The first license computer 1105a removes the software program 1120.--
